**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 13 January 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

### **DETAILED ACTION**

1. The request filed on 1/13/2006 for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 09/682,865 is acceptable and a RCE has been established. An action on the RCE follows.

#### ***Claim Rejections - 35 USC § 112***

2. In response to applicant's amendment of 1/13/2006, the examiner has removed all prior 35 USC § 112 rejections.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6, 11-12, 14, 22, 25-26 and 64-67 are rejected under 35 U.S.C. 102(e) as being anticipated by Gaudoin et al (U.S. 6,296,655).

Gaudoin et al disclose in Figs. 1-2, 4 and 6-8, a device for configuring an inflatable balloon (15) of a balloon catheter assembly having the limitations of the above listed claims, including: a body comprises a plurality of inflatable members (25) defining a channel (34), where the channel sizes to accommodate at least a portion of a balloon catheter (10), where each inflatable member has a balloon contacting portion (30). In fact, Gaudoin et al disclose in figs. 7-8, quite clearly, the inflatable members (25) extends part of the way about the channel but does not encircle the channel. As to claims 2-6, 11-12, 22 and 65-67, Gaudoin et al disclose the device

Art Unit: 3731

comprises at least three inflatable members (fig.4). The inflatable members are tubular and have a circular cross section. The device further has a rigid tube (18). The tube has a first end with a first opening and a second end with a second opening that has a passage therethrough; and where the plurality of inflatable members are disposed in one spiral about the channel (figs.5), and where the inflatable members are generally tubular and have a generally wedge shaped (fig. 3) where the balloon contacting portion is made of a compliant material and non-compliant materials such as latex, PET, Polyethylene or silicone (see col. 1, lines 39-45 and col. 2, lines 60-64), and where the body is disposed between first and second end supports, where the first and second end supports are joined by a plurality of connecting members that are spaced apart from the body . As to claims 25-26, Gaudoin et al disclose in Figs. 1-2,4 and 6-8, a method for configuring an inflatable balloon of a balloon catheter assembly having the limitations of claims 25-26, including: a body comprises a plurality of inflatable members (25) defining a channel. Each inflatable member has a balloon contacting portion.

***Allowable Subject Matter***

4. Claims 7-9 and 28-29 which depend on claim 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record, alone or in combination, discloses all of the limitations of claim 7 including, the device further comprises first and second end caps, where the first end cap disposed at the first end of the tube across the first opening and the second end cap disposed at the second end of the tube across the second opening, and where the inflatable members extend from the first and second end caps, the

Art Unit: 3731

inflatable members in relative alignment with one another, the first and second end caps support the inflatable members.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

***Response to Arguments***

5. Applicant's arguments with respect to claims 1,5,14,25,28 and 64 have been considered but they are not persuasive. Applicant is asked to please refer to the modified prior art rejection above where examiner addresses applicant's concerns regarding prior art rejections.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor X. Nguyen whose telephone number is (571) 272-4699. The examiner can normally be reached on M-F (8-4.30 P.M).
